

SUMMARY

About conclusions of the Doctoral Thesis

*Title: *Development of export of a number of key agricultural products in the process of industrialization and modernization in Vietnam*

* Major: Commercial

* Code: 62.34.01.21.

* Name of PhD Student: Nguyen Thi Chi

* Scientific supervisor: Supervisor 1: Ass. Prof. Dr. Nguyen Van Lich

Supervisor 2: Ass. Prof. Dr. Hoang Van Hoan

* Training facility: Vietnam Institute for Trade – Ministry of Trade and Industry.

*** The Thesis has made a number of new theoretical and practical contributions as following:**

The thesis has systematized and analyzed and clearly interpreted the theoretical bases for developing export of a number of key agricultural products in the process of industrialization and modernization. Especially, on the theoretical bases, the Thesis has identified the basic content for developing export of key agricultural products in the process of industrialization and modernization, thereby building a theoretical framework for developing export of such products in the context of industrialization and modernization

- With collected documents and data from real surveys, the Thesis has clearly identified that the current export of a number of key agricultural products in Vietnam is mainly extensively developed, bringing a low value added in export; in addition, the intensive development of the export still contains many shortcomings, limitations and weaknesses.

- By using the analyzing tools, including export specialization (ES) index, Trade Intensive (TI) Index, etc, the Thesis has identified market outlook, trade flow shift trend, and capacity for developing export of a number of key agricultural products of Vietnam during past time. It demonstrates that there are still many potentials for developing export of a number of key agricultural products of Vietnam in the coming time. This will be basis for making strategic orientation for market development for exporting a number of key agricultural products of Vietnam in the coming time. In addition, the Thesis also identified weaknesses and limitations in developing export of such products of Vietnam and their causes.

- The Thesis has summarized and provided forecasts about prospects for development of markets for agricultural products in the world, recommended the prospects for developing export of a number of key agricultural products of Vietnam by 2020. On that basis, the Thesis has also recommended opinions and orientations for developing export of a number of key agricultural products in the new trend of industrialization and modernization and proposed specific solutions to develop their export by 2020.
